

PEDIATRIC RESIDENCY

At Children's Hospital of Philadelphia (CHOP), we do more than make a difference in the lives of children — we also offer residents unmatched opportunities to train to be the pediatric healthcare leaders of tomorrow.

Options and Excellence

CHOP offers four residency training options, all of which are accredited by the Accreditation Council of Graduate Medical Education. In any given year, we have approximately 150 residents.

- General Pediatrics (three years)
- General Pediatrics and Child Neurology (five years)
- General Pediatrics and Genetics (four years)
- Internal Medicine-General Pediatrics (four years)

While the goal of our program is to provide excellent training in General Pediatrics, we have developed training paths in acute care, medical subspecialty care, primary care and hospital medicine that let residents focus on their interests and career goals. Residents select a path over the course of the first year, and in years two and three, complete six Individual Educational Units (IEUs) that fit that path.

We are also proud of the training our residents gain in child advocacy, quality improvement, patient safety, health equity and clinical informatics — skills that are critical to 21st century healthcare.

What Makes CHOP Special

With nearly 30,000 inpatient stays and more than 1.3 million outpatient visits a year, CHOP offers trainees the opportunity to see the full spectrum of illness, injury and disease. Our patients come from all over the region — and the world, with 114 different countries represented. Few other programs offer this level of diversity.

Our residents consistently report that they feel supported by peers, department chairs and chief administrators. We listen to and appreciate the roles of house staff, and make certain that residents' voices are heard through mentoring systems, annual retreats, regular house staff meetings, resident representation on committees and more.

PEDIATRIC FELLOWSHIPS

Children's Hospital of Philadelphia (CHOP) offers pediatric fellowship opportunities in most medical and surgical subspecialty areas — 70 in all. The depth and rigor of our subspecialty training, including opportunities for research, attract talented physicians and other professionals from programs across the world.

Many of our fellows go on to earn prestigious appointments at CHOP and other institutions — and are known for making amazing breakthroughs in their fields.

CHOP is accredited by the Joint Commission, and most fellowship programs are accredited by the Accreditation Council for Graduate Medical Education (ACGME). Some newer fellowships

represent cutting-edge training and development of other fields. As a result, ACGME has not yet made accreditation available to those fields.

CHOP has approximately 275 total fellows in any given year. Our fellows are part of a supportive community of colleagues and peers. We also have a Fellows' Association, led by a committee of fellows representing all levels of training and supported by the hospital and academic departments.

Fellowship programs include:

- Academic General Pediatrics
- Acute Care Global Health
- Adolescent Medicine
- Advanced Pediatric Neurocritical Care - Critical Care Track
- Advanced Pediatric Neurocritical Care - Neurology Track
- Allergy and Immunology
- Child Abuse Pediatrics
- Child and Adolescent Psychiatry
- Child Neurology
- Clinical Biochemical Genetics
- Clinical Informatics
- Congenital Cardiac Surgery
- Developmental-Behavioral Pediatrics
- Hospice and Palliative Medicine
- Laboratory Genetics and Genomics
- Medical Biochemical Genetics
- Medical Genetics and Genomics
- Mitochondrial Medicine
- Neonatal-Perinatal Medicine
- Oculofacial Plastic Surgery
- Pediatric Anesthesiology
- Pediatric Cancer Immunotherapy and Bone Marrow Transplant
- Pediatric Cardiac Anesthesiology
- Pediatric Cardiac Catheterization
- Pediatric Cardiac Critical Care
- Pediatric Cardiology
- Pediatric Cardiac Anesthesiology
- Pediatric Cardiac Electrophysiology
- Pediatric Cardiomyopathy and Heart Failure and Transplantation

- Pediatric/Congenital Interventional Cardiology
- Pediatric Critical Care Medicine
- Pediatric Dentistry
- Pediatric Dermatology
- Pediatric Emergency Medicine
- Pediatric Emergency Medicine – Global Health
- Pediatric Emergency Medicine – Ultrasound
- Pediatric Endocrinology
- Pediatric Epilepsy
- Pediatric Gastroenterology
- Pediatric General Surgery
- Pediatric Global Health
- Pediatric Headache Medicine
- Pediatric Hematology – Oncology
- Pediatric Hospital Medicine
- Pediatric Infectious Diseases
- Pediatric Inflammatory Bowel Disease
- Pediatric Interventional Radiology
- Pediatric Multiple Sclerosis and Related Demyelinating Diseases
- Pediatric Nephrology

- Pediatric Neurology – Epilepsy Genetics
- Pediatric Neuromuscular Medicine
- Pediatric Neuro-Oncology
- Pediatric Neuroradiology
- Pediatric Neurosurgery
- Pediatric Non-Invasive Cardiac Imaging
- Pediatric Nutrition
- Pediatric Ophthalmology
- Pediatric Orthopaedic Surgery
- Pediatric Otolaryngology
- Pediatric Pathology
- Pediatric Pulmonology
- Pediatric Radiology
- Pediatric Rehabilitation Medicine
- Pediatric Rheumatology
- Pediatric Solid Tumor Oncology
- Pediatric Sports Medicine
- Pediatric Stroke
- Pediatric Transplant Hepatology
- Pediatric Urology
- Post Pediatric Portal Fellowship in General Psychiatry and Child and Adolescent Psychiatry
