# New 32nd edition coming May 2021!

## Red Book®

2021–2024 Report of the Committee on Infectious Diseases, 32nd Edition

Editor: David W. Kimberlin, MD, FAAP

Associate editors: Elizabeth D. Barnett, MD, FAAP; Ruth Lynfield, MD, FAAP; and Mark H. Sawyer, MD, FAAP

**“Refer to the *Red Book*.”** That’s been the watchword for generations of health care professionals seeking trustworthy guidance on pediatric infectious disease prevention, management, and control. Now the 32nd edition continues this tradition of excellence with the latest clinical guidance on the manifestations, etiology, epidemiology, diagnosis, and treatment of more than 200 childhood infectious diseases.

The 32nd edition provides updated evidence-based guidance on pediatric infections and vaccinations based on the recommendations of the committee as well as the combined expertise of the CDC, the FDA, and hundreds of physician contributors.

*Red Book* is an indispensable reference for pediatricians and pediatric infectious disease specialists and is useful for family medicine and emergency medicine physicians as well.

Public health and school health professionals, medical residents, and students will also find it a high-yield source of pediatric infectious disease and vaccine information.

Paperback, available May 2021—1,100 pages

### New in the 2021 *Red Book*

- All chapters were assessed for relevance in the dynamic environment that is the practice of pediatric medicine today, and every chapter has been modified.
- Two chapters have been added to the 2021 edition: *Pseudomonas aeruginosa* Infections and a new “System-Based Treatment” table designed to aid in initial antibiotic selections by clinical condition.
- Standardized approaches to disease prevention through immunizations, antimicrobial prophylaxis, and infection-control practices have been updated throughout the *Red Book*.
- References to evidence-based policy recommendations have been updated.
- Appropriate chapters throughout the *Red Book* have been updated to be consistent with 2021 American Academy of Pediatrics (AAP) and CDC vaccine recommendations, CDC recommendations for immunization of health care personnel, and drug recommendations from 2021 *Nelson’s Pediatric Antimicrobial Therapy*.
