UAB MEDICINE
PEDIATRICS

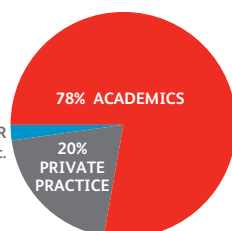

The UAB Pediatric Fellowship Programs at Children's of Alabama provide outstanding training that will prepare fellows to become physician educators, researchers, community physicians and healthcare leaders. Accomplished and experienced faculty teach and support trainees in a clinical learning environment that values excellence in clinical care, patient safety and quality improvement, while helping them achieve their research goals.

Some 70 fellows receive training in a variety of outstanding subspecialty-specific clinical programs. (See opposite page for details.) Since 1990, 409 fellows have graduated from our programs.

PROGRAM HIGHLIGHTS

FELLOWSHIP AWARDS

The Dixon Foundation endows a fellowship program to prepare outstanding fellows in pediatric subspecialties for a career in academia. As part of this prestigious award, recipients benefit from salary support and an additional \$5,000 per year discretionary fund to support research and continuing education.

The Chu Family Educational Scholarship is provided as a generous gift to select pediatric fellows to support their educational initiatives. Some examples of educational endeavors that are suitable for application include: Master of Public Health, Quality Academy, Master of Quality and Safety, Master of Business Administration and others.

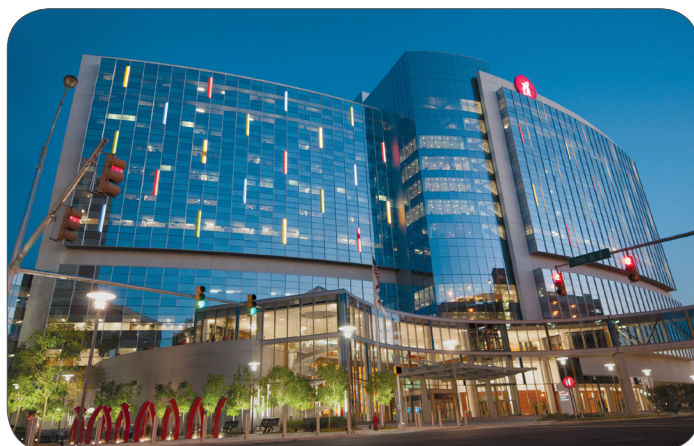

WELLNESS

The Pediatric Subspecialty Wellness Committee plans activities throughout the year to promote teamwork and togetherness amongst the fellows.

RESEARCH

Research training in such areas as bioethics, biostatistics, clinical trial design, outcomes research, translational research and comparative effectiveness research—in world-class labs

- T32 Training Programs
- Pediatric Science Day – held annually to highlight research done by fellows, residents and medical students
- Fellow Research Roundtable held twice a month.
- Monthly Core Conferences for all pediatric subspecialty fellows.
