

Unlock the underlying cause of CKD

**NO-CHARGE GENETIC TESTING
FOR CKD DIAGNOSIS AND GREATER
CLINICAL INSIGHTS**

**CONSIDER YOUR PATIENTS FOR
KIDNEYCODE**

- Simple, no-charge access for physicians and their patients with CKD
- Analyzes 18 genes associated with several rare forms of CKD, including Alport syndrome, FSGS, and one form of ADPKD (*PKD2*)
- Provides precise genetic information to guide important, time-sensitive healthcare decisions for patients at risk of progressive CKD
