What Sets Our Programs Apart

- Care team has extensive experience in all areas of pediatric transplant.
- Work with all payers. Financial coordinator to help patients navigate insurance coverage.
 - Optum Center of Excellence
- Strong culture of patient safety and commitment to hospital-wide error prevention techniques and training. Goal of zero harm to all patients and employees.
- Level 1 Pediatric Trauma Center. Pediatric ICU with pediatric critical care physicians and nurses.
- Ranked in 8 pediatric specialties by *U.S. News & World Report*.
- Transplant physicians involved with research and best practice recommendations on national level.

What Can a Patient Expect

- Pediatric care team includes physicians, surgeons, nurse practitioners, nurse coordinators, social workers, pharmacists, dietitians, and child life specialist solely dedicated to the transplant team.
- Same multidisciplinary team provides care before, during, and after transplant.
- Inpatient and outpatient care with substantial resources and support.
- Support programs designed to help adolescent patients transition to adult care.
- Robust family support services such as music therapy, animal therapy, spiritual care, child life, Ronald McDonald House and Family Room, and more.
- Collaboration with experts at the University of Utah and Intermountain Healthcare.
