US Ordering Information

US Customers call Customer Service at 1-800-356-0007.

Email: customer.service@natus.com

Order Entry Fax: 608.829.8775

Toll Free: 800.356.0007

Our Customer Service Department is here to answer questions and take your orders Monday through Friday from 8 am to 5 pm CST. We can be reached toll-free at 1-800-356-0007 or 608-829-8500.

Place your order by fax, email or online via the Natus Medical Store (US customers only). Please include your phone number on the order so we may contact you if there are questions concerning your order. Fax or e-mail orders may be placed 24 hours a day.

Delivery

We prepay and add shipping charges to orders. Most orders are shipped UPS Ground unless you instruct otherwise. Overnight or second day delivery is available for an additional charge.

Sales Tax

We are required by law to collect all applicable state and local sales taxes. A valid tax exemption certificate is required to avoid applicable fees, and should be provided at time of order.

Damages in Shipment

Despite our best efforts, items may occasionally be damaged in transit. Freight carriers are liable for damages only when damage is indicated on the bill of lading before you sign for shipment. Therefore, we recommend that you inspect the outside and contents of all cartons received. If any damage is found, write details on the bill of lading and ask the delivery carrier to make an inspection immediately. Per ICC regulations, it is the responsibility of the consignee to file a damage claim with the carrier promptly after inspection. For assistance and replacement information, contact our Customer Service Department.

New Products

We are always looking to expand our product line. If there are supplies you use, but don't find in our catalog, please let us know and we will attempt to provide them. Our goal is to become your primary source for quality electrodes and supplies. Thank you for ordering from Natus.

Natus Medical Incorporated can now accommodate supply orders via electronic data interchange (EDI) through Global Healthcare Exchange (GHX). Please contact Natus Customer Service at neuro.customerservice@natus.com for further information. (US only)

Natus Terms & Conditions Apply. See our website natus.com/terms-conditions. All products may not be available in all distribution centers.

ALGO® 5 Newborn Hearing Screener

Tried, tested and true –
The leader in newborn hearing screening

The ALGO 5 cart-based newborn hearing screener combines our trusted ALGO AABR® algorithm with cutting-edge technology in a mobile solution.

- Fully-automated screening parameters and screening results
- Intuitive, graphical interface with integrated touchscreen
- Device-based data management
 - Statistical reports
 - Pre-formatted letter templates
 - Multi-patient management
 - Data-export in a variety of formats
- Integrated comprehensive hearing screening data management software

040587	Jelly Tab sensors – 40 triplets	120/box

ALGO® 3i

Newborn Hearing Screener

Technology you can trust in a handheld screener

The ALGO 3i handheld hearing screener is equipped with the proprietary Natus AABR® technology you trust.

- Fully-automated screening parameters and screening results
- Screen both ears simultaneously
- Colored, graphical displays guide user through the screening process
- Wireless data transfer and data management

ALGO hearing screening supplies are designed with a gentle adhesive for neonatal skin and are clinically validated to achieve optimal results with ALGO hearing screeners.

Echo-Screen® III PRO Hearing Screener

The next generation, automated, all-in-one hearing screener

The Echo-Screen III Pro* device is available in any combination of modalities – TEOAE, DPOAE and ABR – providing all the screening tools you need at your fingertips.

- Fully automated results with standardized, pre-set screen parameters
- Artifact rejection system distinguishes between external noise and patient response
- Choice of CHIRP or click stimulus at multiple levels provides additional screening and research options
- Includes audible data management software

AccuScreen®

Hearing Screener

Quite simply, the logical choice

AccuScreen combines OAE and ABR testing in a single device, featuring ear couplers for binaural, simultaneous ABR testing.

- Clear and intuitive touchscreen display
- Combined OAE/ABR testing: 2-step screening in a single procedure
- Slim and lightweight hand-held device
- Multi-purpose docking station

RetCam® Wide Field Digital Imaging Systems

Taking pediatric ocular imaging to new places

RetCam is a fully integrated wide-field digital imaging system for the hospital and clinic. This state-of-the-art system provides ophthalmic visualization and photo documentation with features that help assure the capture of pediatric ocular images.

- Objective, high-resolution digital visualization and documentation, for definitive interpretation
- Full 130-degree view
- Enables image comparison over time to help guide treatment decisions surrounding disease progression management
- RetCam Review Software (RCRS) facilitates remote consultations, second opinions, family communications, treatment compliance and teaching
- Available in multiple configurations

- neoBLUE® LED Phototherapy Systems
- neoBLUE® Radiometer

neoBLUE® LED Phototherapy System

Optimal blue LED technology for the treatment of newborn jaundice

The neoBLUE device is designed with a versatile light enclosure and roll stand and is ideal for use with incubators, radiant warmers and bassinets. The device features two intensity settings and large surface area coverage.

- neoBLUE LEDs do not emit significant light in the ultraviolet (UV) range – reducing the potential risk of skin damage
- neoBLUE LEDs do not emit significant light in the infrared radiation (IR) range – reducing the potential risk of fluid loss
- Versatile light enclosure provides power of multiple lights with one device
- Available light drape designed to block light from caregivers
- Meets AAP Guidelines for intensive phototherapy

neoBLUE LED phototherapy system ordering information

Part #	Description
010066	neoBLUE LED phototherapy system
001241	Light drape
900627	Yellow lens safety glasses
001841	LED light panel for neoBLUE system
001376	neoBLUE light enclosure (light only)
010814	neoBLUE light, roll stand

neoBLUE® compact LED Phototherapy System

Incredible performance and value with many user-selectable features

The neoBLUE compact device provides intensive blue light in a versatile and efficient design for treating newborn jaundice. The device features two intensive settings, color balanced blue treating light, white exam light and is configurable for various use settings.

- Easily switch between blue treatment light and white exam light
- Two intensity settings, adjustable to accommodate different treatment needs and environments
- Designed for multiple configurations
 - Independently by placing directly on top of an incubator
 - Combine with the arm for attaching to the pole-mount accessory of most incubators and radiant warmers
 - Combine with the arm and roll stand for use for infants in a bassinet, open bed, incubator or radiant warmer
- Meets AAP Guidelines for intensive phototherapy

019060	neoBLUE compact carrying case

neoBLUE® blanket LED Phototherapy System

Supports family-centered care and newborn development

The neoBLUE blanket device is positioned underneath the baby to deliver phototherapy via a blue LED light source and fiberoptic blanket with a soft and flexible design. The blanket/pad fits easily within patient care enclosures, such as cribs, bassinets, radiant warmers and incubators, while also allowing baby to be held during phototherapy treatment.

- Skin-to-skin contact or kangaroo care continues during treatment
- Avoids subjecting sensitive newborns to the discomfort and distress of unwrapping and exposure to overhead blue light
- Breastfeeding and caregiving can continue during phototherapy
- Ideal for home-based phototherapy programs
- Meets AAP Guidelines for intensive phototherapy

neoBLUE® Radiometer

Accurately measure the intensity of neoBLUE LED Phototherapy systems.

The neoBLUE Radiometer measures spectral irradiance of light in the blue spectrum. It is battery operated, includes hold/run functions, and is intended to be used only with the neoBLUE LED Phototherapy product line.

- Easy to use and read with large clear display
- Measures all neoBLUE LED Phototherapy Systems
- Precision optical system provides reliable, reproducible measurements
- Helps compliance with AAP Guidelines by providing accurate readings in blue spectrum*

- CFM Olympic Brainz Monitor

CFM Olympic Brainz Monitor

Simple, automated, secure – for optimal cerebral function monitoring

The Olympic Brainz Monitor (OBM) provides continuous cerebral function monitoring at your fingertips. The easy-to-use system with easy-to-apply electrodes provides quick and simple routine bedside monitoring. OBM is your trusted partner in the NICU, providing actionable neurological information during critical times.

- Easy bedside setup; plug in the unit, apply electrodes and record
- Intuitive navigation and versatile patient settings
 - Up to 3-channel, cross-cerebral or right or left hemisphere monitoring
 - Easily add an additional channel to an existing single-channel setup
- Two unique automated software application to assist in recognizing background patterns and indicate if seizure activity may be present
- Disposable electrodes help reduce the risk of infection

Biliband® Eye Protector

Providing exceptional eye protection for neonatal phototherapy

Biliband eye protectors block harmful light to baby's eyes during phototherapy treatment. Special eye-pad material blocks light to the eyes, while the headband design allows phototherapy light to reach baby's head.

- Remains securely in place with unique Y-shaped design
- Conforms to any head shape with easy-to-use, adjustable tabs
- Material minimizes the risk of skin irritation and is not made with natural rubber latex
- Feels soft and comfortable around baby's head and face

Biliband ordering information

Olympic Smart Scale®

The ultimate standard for accurate weight

Olympic Smart Scale Models 60 and 65 combine remarkable accuracy with simple operation. With the Smart Scale, changing numbers do not have to be tracked – the final weight is automatically computed to the nearest gram and locked on the display. One can continue caring for the baby and chart the weight when convenient. Even if the baby is removed from the scale, weight remains locked on the display.

- Weigh active babies quickly and accurately
- Four-sided easy lift trays are safer for babies while weighing
- Available as table-top or roll around models

NeatNick®

Sweeping Action Heel Lancet

Produces great blood flow, less rejects and less pain

NeatNick's faster blade speed produces a virtually instantaneous incision meaning less pain for the baby. The high-precision surgical blade produces an accurate, clean-edged incision through the capillary bed, at a depth level comparable to other sweeping lancets. With NeatNick, you are certain of rapid, ample blood draws, without excessive, painful squeezing. You get better results in less time and with less pain.

- Faster blade speed means less pain for babies
- Smooth firing – does not "jump"
- Bright tropical colors make it easy to find
- Reduces newborn screening reject rates and reduces hemolyzed samples

NeatNick ordering information

Part #	Description	Quantity
1030083	Preemie size – Lime green heel lancets	100/box
1030085	Full-Term size – Mango orange heel lancets	100/box

Note: Independent studies May 2009, on file

SugarPlum®

Glucose Lancet

Glucose blood draws made quicker and easier

SugarPlum's patented design makes glucose draws quicker, easier and more comfortable for your babies. Press against the heel – SugarPlum automatically fires at the correct pressure. Before and after firing, the needle is safely concealed in the plastic body.

- The same lancet style used for adult glucose tests – but sized for babies
- Two controlled depths:
 - 1.0 mm depth for micro-preemies to full-term babies
 - 1.8 mm depth for full-term babies and adults
- Sterile, single-use needle retracts and locks after use

SugarPlum ordering information

Part #	Description	Color	Size	Quantity
1040043	1.0 mm depth 21G, 5-10 µl	Yellow	Micropreemies to full-term babies	100/box
1030085	1.85 mm depth, 21G, 10-20 µl	Gray	Full-term babies to adults	100/box

MiniMuffs®

Neonatal Noise Attenuators

Provides a safe environment for healthy development

MiniMuffs neonatal noise attenuators are designed to protect the sensitive ears of premature babies. They fit comfortably around the baby's ears and help to reduce the disruptive noise levels associated with special patient care procedures and transport.

- Ideal during special patient care procedures and transport
- Reduces sound levels by at least 7 decibels
- Fits comfortably around the baby's ear with a soft foam oval-shaped design and gentle hydrogel adhesive
- Disposable, single-use for optimal infection control

Part #	Description	Quantity
040341	Neonatal noise attenuators, individually wrapped in pairs	36 pairs/box

Save the Gonads™

Protects your babies during x-rays

Save the Gonads shields are specifically designed to protect the reproductive organs of babies receiving x-rays by blocking harmful radiation. Shields are composed of 1 mm thick lead to protect babies' gonads from the harmful radiation associated with x-rays.

- Help clinicians comply with JCAHO and FDA patient radiation standards
- Small, lightweight design and satin cover ensure comfort on baby's fragile skin
- Unique heart shape allows placement on both males and females

Save the Gonads ordering information

Part #	Description	Quantity
900835	Save the Gonads Nano-Premature Shields	25 units/pack
900772	Save the Gonads Micro-Premature Shields	25 units/pack
900773	Save the Gonads Premature Shields	25 units/pack
900774	Save the Gonads Newborn Shields	10 units/pack
900845	Save the Gonads Sample Pack of Shields — 3 nano-premature — 3 micro-premature — 3 premature — 1 newborn	10 units/pack

Providing expert knowledge, clinical expertise and advanced education – whatever your role, wherever you work.

At Natus, we understand that empowering healthcare professionals is the key to advancing patient care and improving clinician workflow.

Working in partnership with customers and medical societies around the world, Natus Academies offer free global access to educational programs & resources, designed to enrich product expertise & clinical knowledge and help users stay ahead in their fields.

Membership is free and open to all

Choose the academy that is right for you:

The Natus Neonatal Care Academy is our educational program for neonatology and neonatal care professionals around the globe.

The Natus Hearing & Balance Academy explores the latest technological and scientific developments in hearing assessment and screening, hearing aid fitting and balance assessment.

The Natus Vision Care Academy is our education platform for neonatal and pediatric imaging professionals around the globe.
